THE FUTURE S NOW

At Zummo, we strive to be an innovation benchmark; by setting trends rather than following them, by keeping ahead of consumers' needs rather than waiting for them to tell us what they need. Because, for Zummo, the future is now.

Society works and consumes differently. The happiest and most productive workplaces are not just responding to this change, but they are also leading it. Do you want to be one of them?

The food that we find at work, apart from reflecting food trends, must help to create an excellent experience that will squeeze all the potential from the workers. This is a holistic approach: it does not just foster the performance of people, but it also strengthens the company's reputation, positioning it as it a favourite firm where people want to work.

This is your moment. Disconnect, have a Zummo and feel good.

The workers are aware of how important it is to look after themselves, health-wise, and they want to have access to nutritional food that will help them to maintain a healthy diet and feel well. With Zummo, the workers' access to healthy food is simplified. With Zummo, companies can make a real difference in the health and wellbeing of their workers.

HEALTHY LIFE

A freshly-squeezed fruit juice satisfies the expectations of healthy consumers. And with Zummo, they also obtain:

-User Experience: customers play a key role. They activate the juice extraction and witness the whole process.
-Variety: juice from different types of fruit, alone or combined.
-Inmediacy: instant and ready-to-drink juice.
-Grab & Go: takeaway juice. The customer squeezes it and drinks it anywhere and anytime.

The Healthy food concept has evolved. What was, a few years ago, limited to lowcalorie and low-fat food, has now spread to healthy and sustainable food, focusing on consumers' well-being and protecting the environment.

"Consumers want to eat more healthfully,

8.8%

MASS GRFFN

The Mass Green movement is based on a new consumption method. It is a change brought about by consumers themselves, in their search for both their physical and emotional well-being. This change influences the whole food value chain, giving way to new consumption methods, and the market needs to adapt to this new paradigm.

The heart of our extraction system

EVS

Purer and more natural juice

The oils that are naturally present in the peel of the fruit never enter into contact with the juice or with the parts that make up the juice extraction kit.

Maximum efficiency

It prevents jamming caused by peel, and it minimises splashes and pulp remains that might be generated, further facilitating the cleaning process.

Each cup houses one half of the fruit and continues to rotate up to 180°.

The cut fruit is pressed vertically against the balls and the juice is obtained, which goes directly to the receptacle.

ZUMM®

With EVS® we maximise the yield of Zummo juicers. Whatever the citrus fruit used. Whatever the calibre.

Maximising the yield of your juicer was never so easy or quick. Just select the juice extraction kit that adapts best to the calibre of the fruit you are going to squeeze. It is very easy. Our kits cover a wide juice extraction range, from Ø 40 to 100 mm, or in other

words, from limes to large grapefruit. Because our juice extraction kits have been developed to squeeze any type of citrus fruit, and also pomegranates.

A tip...

How to identify the right Juice Extraction Kit to maximise the yield of your Zummo.

If the diameter of the fruit is compatible with two Juice Extraction Kits, we advise you to choose the smallest of the two.

For example, to extract juice from Ø 74 mm oranges with Z14 Nature, we could use either kit L or kit M. In this case, it would be advisable to do it with kit M.

Easier to identify!

Our juice extraction kits come in different colours: grey, orange, maroon and pink. Each colour corresponds to a kit size, so they are easily identifiable.

Kit S: limes, tangerines and small oranges. Kit M: oranges and lemons. **Kit L:** large oranges, grapefruit, and pomegranates* **Kit XL:** extra large oranges, grapefruit and large pomegranates*

*Suggested fruit. Using one kit or another will depend on the calibre of the fruit to be squeezed.

Do not forget that...

Every juicer model has its own specific kits.
Although the different machine kits are the same colour, they do not necessarily share the same juice extraction range, so, a priori, they are not exchangeable between different machine models.

- The colours of the juice extraction kits are independent of the colours of the machine containers.

One of the major constant features of Zummo is facilitating the usability of our juicers as much as possible. With this objective in mind, we developed the Auto Cleaning System, an automatic cleaning filter system, included as standard in models Z06, Z14 and Z40 of the Nature range.

How does it work?

juicer's yield with the automatic filter. It has a polyurethane band that enters into motion when and pulp resulting from the juice extraction, and depositing them in the peel containers.

How does the Auto Cleaning System improve your Zummo experience?

— Greater autonomy. You can spend more time on other tasks, as you will not have to worry about

squeezed juice until it reaches the glass is shorte-ned, as there are no pulp remains to impede it. So, the juice reaches the glass with the most natural and purest flavour possible.

drop is wasted when the juice passes through it.

0. *Consult the user manual to follow the details of the cleaning and sanitation process.

We want you to

important things

spend your time on

18

Cleaning and hygiene in 4 steps*:

- Dismount the juicer parts.
- Wash them by hand, with neutral soap, or in dishwasher (except for the front
- Disinfect the parts with a product that is suitable for food use.
- Mount the parts on the juicer.

The easy-clean feature of the juicers is essential to minimise the time spent on maintenance. Preventing the generation of waste during the juice extraction process is just as important as having an easy, fast and intuitive cleaning process. At Zummo, we know this, so all our juicers are Easy Clean.

Zummo

Other Adapt Tray benefits:

- **Easy-to-clean.** The Adapt tray comprises just two pieces that are very easy to dismount and clean, even in the dishwasher. - Hygiene. The largest flow rate of the tap helps to fill bottles in less time, avoiding jamming; and its interior design prevents the juice from depositing on the base. - Image. The Adapt tray is totally integrated with the Z40 Nature design, providing the product with an elegance and quality bonus.

For Z40 Nature TAPTRAV

The Adapt tap tray, developed by Zummo and standard in all the Z40 Nature models, provides the machine with a series of advantages that convert it into a reference in the sector. The operator can choose the juicer operating model by just turning a knob: Fixed mode (programming the number of pieces of fruit to juice) or Self Service mode (the juice extraction is activated when the machine is turned on).

Zumm

«When we started out on this adventure, almost 30 years ago now, I could never have imagined getting as far as we have today, distributing energy to so many people.

Ever since I was a kid, I have lived surrounded by orange groves. I suppose that, without realising it, they started to become part of my life; so much so, that they became an essential part of it, my passion, encouraging me to put all my energy into trying to obtain maximum purity from the fruit. I decided, together with Rafa, my son-in-law, to set up a modest workshop in a small garage. There we would construct the first machine prototype that would manage to squeeze oranges, obtaining a perfect juice.

Today, after all these years, and seeing how we have evolved since we started in that garage, I feel very proud. Proud of feeling how that ambition has given its fruit, and how, today, we have a promising future ahead, and that we haven't lost any of that passion we began with».

Founder of Zummo

WHY IS ZUMMO DIFFERENT?

All our efforts are aimed at offering excellent juicers, which obtain the best juice in the easiest and most cost-effective way. Learn how we achieve this.

☑ Flavour and purity

Our vertical juicing system, EVS® is the essence of our juicers, and it is what sets them apart. The juice never enters into contact with the peel and the path to the disposable cup is minimal, guaranteeing maximum purity and the most natural flavour.

☑ Yield

Our juice extraction kits cover the widest juice extraction range of the market. They are compatible with 40 to 100 mm diameter fruit. This, together with the EVS® technology, maximises the juice extraction yield, whatever the citrus fruit and whatever the size.

☑ Adaptability

We are not just talking about orange juice. With Zummo, squeezing juice from pomegranates, grapefruit, limes or mandarins is just as easy*

☑ Easy clean

Minimise the generation of waste during the juice extraction process, making the cleaning process easy, fast and intuitive. Reduce the time spent on servicing your juicer.

*Consult compatibilities per model

FOOD SERVICE

Restaurants, bars, cafeterias, hotels, shops... the Zummo Food Service line has been designed to provide service in any type of establishment. Depending on the characteristics, Zummo offers each business the perfect juicer to cover their needs and get maximum return on their investment.

Z14 Nature is the most highly recommended option for businesses with high juice consumption. The capacity of its baskets and of its peel containers provide it with great autonomy, a key factor for buffets, restaurants and the retail sector.

Pomegranate juice is a trend that is here to stay. Thanks to the healthy properties of this super-food and its characteristic flavour, it has become a highly demanded option by consumers, and therefore, available in more and more establishments. Have your tried combining it with orange, grapefruit or lime juice?

> *Recommended models: Z06 Nature, Z14 Nature and Z40 Nature, in all versions. Vending ZV10 Nature and ZV25 Nature.

Now, Z14 Nature also squeezes pomegranates.

Z14 Nature has evolved. Zummo presents this updated version which includes a series of technical adjustments, made to be able to juice pomegranates more efficiently, without interruption, without incidents, and with maximum yield.

Adapt Tray

Model Z40 Nature is the perfect juicer to attend to the needs of mass catering and superstores. Its capacity to extract large amounts of juice in a short period of time - up to 40 pcs. of fruit per minute– permits satisfying the typical demand peaks of this type of establishment.

«Over the last few years, we have carried out different actions to maximise our workers' well-being. One of the most-liked proposals has been the installation of a Z14 Contactless juicer in our Coffee Service, as well as a Z10 vending machine in the lobby. This measure has been welcomed by all colleagues. Moreover, we contribute to fostering a healthier lifestyle, which is one of the main pillars of our Social Corporate Responsibility policy: disseminating good practices that focus on promoting employees' health and well-being».

WEARENOT JUST TALKING ABOUT ORANGE JUICE.

The perfect breakfast, tea or snack are much more than the classical orange juice. Zummo opens up new possibilities for increasingly demanding consumers who are hungry for new experiences: in addition to orange juice, add grapefruit, tangerine, lime, lemon or pomegranate. Alone or combined. **With Zummo, any option is possible.**

nates	Grapefruit

	\checkmark	
	\checkmark	
	$\overline{\checkmark}$	

Flexibility is a priority today. People eat when they need to, with no preset times or places, and they move around according to their own preferences: first thing they go out for a run, they have breakfast on their way to work, they have a coffee mid-morning, and a snack midafternoon; but people no longer want processed and nutrient-poor products, people want healthy options.

The Z14 Nature Contactless model is the best choice. This Z14 Nature version has a payment system that activates the machine, squeezing the juice right then. And the user witnesses the entire process! That is why it is the ideal option for your offices, OCS, coworking spaces, grocerants, convenience stores or hotel lobbies.

*Some of the payment gateways supported:

Zummo launches its juicer line with builtin cashless payment systems, to enjoy a freshly-squeezed juice anywhere and anytime.

«Our company is engaged in marketing organic fruit and vegetables for the Food Service sector. There is increasingly more awareness about caring for one's own health and the planet's health, so we give our customers top quality bio and km0 products. I must acknowledge that including Zummo juicers in our offer was not something that we had considered at the start of this project. The need arose from our customers. They wanted to offer a juice that would maintain all the properties, as well as the flavour of organic products – that was when we started to investigate. We had heard about the Zummo juicers and their EVS[®] and we didn't think twice. Our main business model is leaving the machine at our customer's facilities, in deposit, and become their fruit suppliers. We also collect the peel from the squeezed fruit for composting. A win-win situation with which we are more than satisfied, as are our customers!».

INNOVATION

Innovation is part of our DNA. In 1992, our starting point was the development of EVS®, a unique system which has made us the company we are today.

Now, at Zummo, our efforts are still aimed at innovating, identifying resources that will enable us to provide society with better products, increasing competitiveness, and committing to a business model based on identifying, developing and implementing new ways of doing things.

The most outstanding innovation milestones of Zummo are:

- EVS
- Pomegranate juice
- Vending
- Adapt tray

The OCS (Office Coffee Service) concept has become an essential asset in any company or workplace. Different studies ratify what is already a reality: a quality coffee area is greatly welcomed by workers; it makes them feel more highly considered, attracting new talents, retaining personnel, and ultimately, improving productivity.

But, what do workers really need?

«73% of the workers consider that their organisation must provide healthy food at work».

-068%

«84% of the CEOs describe the need to improve the employee's experience as an "important" or "very important" topic».

" Request healthy products in their company

There are more than 317,000,000 companies in the world. There are more than 25,000,000 companies in Europe. There are more than 1,330,000 companies in Spain.

100

Offering a coffee service is no longer enough. Consumer trends have evolved towards healthy food and this repeats itself in the labour sphere. Natural, non-processed and sustainable products are essential to complete any quality Office Coffee Service. This trend is going to spiral up over the coming years, as the new generations are the most critical when asking their companies for healthy products.

With the modular corners, different pieces can be combined to achieve a totally personalised unit. Combining juice extraction, bottlerack and storage modules offers endless possibilities that will adapt to each customer's specific needs, to create their ideal solution.

We collaborate with HMY in our new projects. The HMY Group are leaders in engineering, manufacturing and assembly of furniture for retail, and experts in offering integrated solutions for brands and retailers.

With the Multifruit range, Zummo adapts its original Z40 Nature Adapt to juice pomegranates, limes, tangerines and lemons, as well as oranges, adapting to the characteristics of each fruit to obtain maximum yield. The Multifruit range is a novel solution, designed to extend the juice offer, obtaining maximum return on investment from each one of them.

«Competition has intensified. Customers are no longer loyal to their local fruit shops, which is what used to happen; they are now taken away by those proposals that afford them an added value, a user experience. That is why I decided to rent a ZO6 juicer for my shop. Customers love coming, selecting the fruit, citrus fruit or pomegranates themselves, and making instant juice. They even come from all over the city! The truth is that I am so satisfied with the results that I am considering installing another Zummo juicer».

Fruit Seller

VENDING NATURE

"The tendency in trade is to automate sales processes, and thus save costs, personnel and time.Vending has become one of the most lucrative and fast-growing commercial activity worldwide over the last few years. It is an ingenious way of harnessing resources, which can provide an additional source of income or become your main economic activity".

The 5 vending keys:

1.Time. Once your Zummo Vending network has been implemented, the time investment is minimal. Estimated: For every 100 machines, just 30 weekly working hours are required, approximately.

2.Open 24h. Generation of income day and night, 365 days a year, with no social security, benefits or staff costs.

3.Investment. The overheads and maintenance costs of the Zummo Vending model are low, which affords a return on investment in a very short time, quickly increasing the capital.

4.Juice. As juice is an impulse product, the model becomes a highly profitable business.

5.Vending. This sales model is increasingly more implemented.

-We are aware that our image is determined by the quality of our products and services, and therefore by the human team behind them. The effort, development and innovation of our machines are certified by the approvals we have achieved; all of them have EC certification. The other certifications are available according to models. These approvals enable us to market the Zummo machines in the main markets. Zummo has developed an Integrated Quality Management System to design automatic citrus fruit juicing machines, certified in terms of quality, by TÜV NORD according to ISO 9001.
